## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include one or more reference signs not mentioned in the description. Note, for instance, "120" (shown in Fig. 5b, for instance) and "214" (shown in Fig. 6, for instance).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) and/or an amendment to the specification in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The abstract of the disclosure is objected to because it is not "within the range of 50 to 150 words." Appropriate correction is required. See MPEP § 608.01(b).

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Barkhuff et al. (US 3,994,017).

Barkhuff teaches a magnetic (lines 46-48 in column 6, for instance) disk (1) comprising an inner diameter (16a); an outer diameter (as shown in FIG. 2, for instance); and a plurality of disk through apertures (each 1b, for instance) adjacent to the inner diameter (as shown in FIG. 2, for instance), the disk through apertures being circumferentially spaced-apart (as shown in FIG. 2, for instance) and extending longitudinally through the magnetic disk (as shown in FIGS. 1-2, for instance); wherein the disk through apertures allow airflow to pass through when the magnetic disk is rotating (lines 36-38 in column 5, for instance) [as per claim 5]; wherein the disk through apertures are generally equally circumferentially spaced-apart (as shown in FIG. 2, for instance) [as per claim 6].

***Claim Rejections/Consideration - 35 USC § 103***

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

***Pertinent Prior Art***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. This includes DeMoss et al. (US 4,345,285), which teaches a disk drive having disks with apertures formed therethrough and spacers with apertures formed therethrough aligned with the disk apertures (as shown in Fig. 5A, for instance); Hama (JP 02-252185) and Momoi et al. (WO 2004/051642 A1), which each individually teaches a disk drive having a disk clamp with apertures formed therethrough and spacers with apertures formed therethrough; and Cockrell, Jr. (US 3,573,771), King (US 3,975,769), and McGinnis et al. (US 4,051,541), which each individually teaches a disk drive having at least one disk with apertures formed therethrough.

***Allowable Subject Matter***

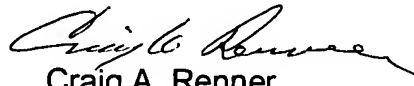

7. Claims 1-5 are allowable over the prior art of record.

**Conclusion**

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Craig A. Renner whose telephone number is (571) 272-7580. The examiner can normally be reached on Monday-Tuesday & Thursday-Friday 9:00 AM - 7:30 PM.
